

Stage V:Heuristic evaluation

In this stage, each project will be evaluated by a group of evaluators. A project will be assigned to a group of evaluators, and the group must produce an evaluation report.

Objective: Do the heuristic evaluation of an interactive system's interface.

Description: Each student/evaluator must run the applications they have been assigned, and perform the heuristic evaluation of each one. They must meet with the other evaluators of the same project and the group must produce, for the project in question, a single evaluation report. Projects submitted to evaluation are:

Work	Author	Project
1	Eduardo Eloy	Hiker's App
2	Eduardo Medeiros	ABay
3	Francisco Rodrigues	Crowder
4	Luís Ressonha	VisitAdvisor
5	Ruben Teimas	GBL
6	Yaroslav Kolodiy	D?ont Waste App
7	Laaroussi El Ayman	Online Food Delivery Website

The following table shows the group of evaluators for each project. Evaluator **i** is the author of project **i**.

Project	Evaluator
work 1	{3, 4, 5}
work 2	{1, 6, 7}
work 3	{1, 2, 5}
work 4	{3, 6, 7}
work 5	{3, 4, 7}
work 6	{2, 4, 5}
work 7	{1, 2, 6}

Each evaluator must download the applications assigned to him. The download should be done in the Moodle Section "Student Projects".

If the evaluator can not run the application, he must send a message to the "stage 5 forum" existent in the same Moodle area.

During the course of that evaluation, pay attention to your mailbox, in case of need to help your evaluator to run your application.

Report: For each detected problem, the evaluation report should include:

- Problem description: brief description of the problem (including the violated heuristics).
- Location of the problem (optional): in case of need, print screens and sign the interface elements that should be modified.
- Severity rate.
- Suggestions to solve the problem.
- The evaluator that found the problem

You should use a table to format your report (please see below):

Nº	Problem	Heuristic	Description	Severity	Solution	Screenshot	Evaluator

Deadline: By June 21, you must submit the evaluation report on moodle, in the area provided for this purpose. All evaluators submit the group report. Hopefully they match.
