Discipline: Interfaces Pessoa-Máquina   Stage: Project VI/VI

Stage VI: Evaluation results and presentation of the final project

During this stage you should plan the last corrections and improvements to your project, based on the evaluation results you received from stage 5, and present your project.

Objective: Plan the last corrections and improvements to your project, based on the evaluation results you received from stage 5, and present your project, justifying your design decisions.

Description: Make a list of the problems pointed out by the heuristic evaluators and propose possible solutions or justify your design decisions (in case you do not agree with the evaluators). Fix essencial problems, start with the severe problems.

A final report, where you present your project, should be made. This report, must include all the stages of the project, and a guide por running a demo of the project.

Submission: If you change your prototype you must submit a new demo of it, in addition to the report. A single zip file, named as usual as: IPMP6_FINAL_nABCD.zip, where nABCD is your student number.

Deadline: One week after the reception of the evaluation results.
